Molecular Cell Research
including Signal Transduction
Vol. 1177, 1993

Cumulative Contents

Information for Contributors vii

Regular Section

Regular Papers

Ca^{2+} antagonists do not protect isolated perfused rat hepatocytes from anoxic injury
A. Gasbarrini, A.B. Borle and D.H. Van Thiel (USA) 1

Increase of adipose differentiation by hypolipidemic fibrate drugs in Ob 17 preadipocytes: requirement for thyroid hormones
J. Gharbi-Chihi, M. Teboul, J. Bismuth, J. Bonne and J. Torresani (France) 8

Binding sites for short-term glycated albumin on peritoneal cells of the rat
S. Krantz, R. Brandt and B. Gromoll (Germany) 15

Identification and characterization of nuclear calmodulin-binding proteins of *Saccharomyces cerevisiae*
K. Hiraga, K. Suzuki, E. Tsuchiya and T. Miyakawa (Japan) 25

Thapsigargin, an inhibitor of endoplasmic reticulum Ca^{2+}-ATPase, enhances c-*fos* expression but antagonizes vacuole formation of human hepatoma cells induced by teleocidin
A. Tsukamoto, Y. Kaneko and K. Kurokawa (Japan) 31

The relationship between L-arginine-dependent nitric oxide synthesis, nitrite release and dinitrosyl-iron complex formation by activated macrophages
A.F. Vanin, P.I. Mordvintcev, S. Hauschildt and A. Mülsch (Russian Federation, Germany) 37

Characterization of prostaglandin E_2 receptors expressed on human monocytic leukaemic cell line, U937
C.L. Loh, D. Rotondo and A.K. Dutta-Roy (UK) 43

Differential effects of the phorbol ester TPA on DNA-mediated transfection in a variety of cell lines
J.T. Reston, S. Gould-Fogerite and R.J. Mannino (USA) 49

Hexose metabolism in pancreatic islets: time-course of the oxidative response to D-Glucose
A. Sener, F. Malaisse-Lagae and W.J. Malaisse (Belgium) 54

Swelling-induced O_2^- generation in guinea-pig neutrophils
M. Miyahara, Y. Watanabe, K. Edashige and K.-i. Yagyu (Japan) 61

Rapid Report

Inhibition of stimulated bone resorption in vitro by TIMP-1 and TIMP-2
P.A. Hill, J.J. Reynolds and M.C. Meikle (UK) 71

Subsection

Regular Papers

Calphostin C, a specific protein kinase C inhibitor, activates human neutrophils: effect on phospholipase A_2 and aggregation
S. Svetlov and S. Nigam (Germany) 75

1,3-Dioctanoylglycerol modulates arachidonate mobilization in human neutrophils and its inhibition by PGBx: evidence of a protein-kinase-C-independent role for diacylglycerols in signal transduction
M.D. Rosenthal, K.S. Lattanzio and R.C. Franson (USA) 79

Unilateral nephrectomy selectively stimulates phospholipase D in the remaining kidney
Z. Gatalica, G. Moehren and J.B. Hoek (USA) 87

Development of an antiserum to rat-brain A_1 adenosine receptor: application for immunological and structural comparison of A_1 adenosine receptors from various tissues and species
H. Nakata (Japan, USA) 93

Catecholamine secretion induced by tetraethylammonium from cultured bovine adrenal chromaffin cells
C. González-García, V. Ceña, H.R. Keiser and E. Rojas (USA, Spain) 99

Errata 107

Regular Section

Regular Papers

An analysis of intracellular ^{23}Na relaxation using the double-quantum filtered NMR signal from the perfused rat salivary gland
Y. Seo, W.D. Rooney and M. Murakami (Japan, USA) 111

Characterization of the P-glycoprotein over-expressing drug resistance phenotype exhibited by Chinese hamster ovary cells following their in-vitro exposure to fractionated X-irradiation
S. McClean, R.D.H. Whelan, L.K. Hosking, G.M. Hodges, F.H. Thompson, M.B. Meyers, G.J. Schuurhuis and B.T. Hill (UK, USA, Netherlands) 117

Comparative effects of cytochrome *P*-450 inhibitors on Ca^{2+} and Mn^{2+} entry induced by agonists or by emptying the Ca^{2+} stores of human neutrophils
M. Montero, J. Garcia-Sancho and J. Alvarez (Spain) 127

HT29-18-C_1 intestinal cells: a new model for studying the epithelial transport of drugs
P. Wils, S. Legrain, E. Frenois and D. Scherman (France) 134

Phorbol ester treatment of two megakaryoblastic cell lines, CMK and UT-7, induces specific protein composition changes with non-coincident time-courses
M. Moroi, M. Ohnuma, N. Komatsu, Y. Miura, T. Sato and S.M. Jung (Japan) 139

Effect of glucose and insulin deprivation on differentiation and carbohydrate metabolism of rabbit proximal tubular cells in primary culture
F. Courjault, J. Chevalier, D. Leroy and H. Toutain (France) 147

Epidermal growth factor stimulates phosphorylation of eukaryotic initiation factor 4B, independently of protein kinase C
R.M.F. Wolthuis, A.F.M. Cremers, M.A.M. Kasperaitis, C. Van der Mast, H.O. Voorma and J. Boonstra (The Netherlands) 160

Cyclic AMP inhibits the respiratory burst of electropermeabilized human neutrophils at a downstream site of protein kinase C
T. Mitsuyama, K. Takeshige and S. Minakami (Japan) 167

Induction of metalloproteinase activity in human T-lymphocytes
H. Zhou, E.J. Bernhard, F.E. Fox and P.C. Billings (USA) 174

Nitric oxide is produced during TNF killing of U937A cells but does not contribute to the cytotoxic process
C. Southern and N. Matthews (UK) 179

Coordinate induction of acyl-CoA binding protein, fatty acid binding protein and peroxisomal β-oxidation by peroxisome proliferators
J.P. Vanden Heuvel, P.F. Sterchele, D.J. Nesbit and R.E. Peterson (USA) 183

Insulin and platelet-derived growth factor acutely stimulate glucose transport in 3T3-L1 fibroblasts independently of protein kinase C
N.W. Merrall, M.J.O. Wakelam, R. Plevin and G.W. Gould (UK) 191

Occupancy of P- purinoceptors with unique properties modulates the function of human platelets
G. Soslau, I. Brodsky and J. Parker (USA) 199

A newly recognized action of cholecystokinin on pancreatic acini-release of lactate dehydrogenase
S.T. Bhat, R. Vinayek, R.T. Jensen and J.D. Gardner (USA) 208

Subsection

Effect of bradykinin on cytosolic calcium in neuroblastoma cells using the fluorescent indicator fluo-3
M.A. Yorek, E.P. Davidson, J.A. Dunlap and M.R. Stefani (USA) 215

Specific dephosphorylation of phosphopeptides by the yeast alkaline phosphatase encoded by *PHO8* gene
A. Donella-Deana, S. Ostojić, L.A. Pinna and S. Barbarić (Italy, Croatia) 221

Regular Section

Regular Papers

Avidin attachment to biotinylated human neutrophils induces generation of superoxide anion
V.R. Muzykantov, T.A. Kushnareva, M.D. Smirnov and E.K. Ruuge (Russia) 229

Interactions of iron-anthracycline complexes with living cells: a microspectrofluorometric study
M. Fiallo, A. Laigle, A. Garnier-Suillerot, C. Amirand, J.-P. Ballini, L. Chinsky, M. Duquesne, B. Jolles, F. Sureau, P.-Y. Turpin and P. Vigny (France) 236

Gastrin action on aminopyrine accumulation in isolated pig parietal cells requires cAMP
J.L. Cabero, Z.-Q. Li and S. Mårdh (Sweden) 245

Subsection

Minireview

Lithium and myo-inositol homeostasis
D. Gani, C.P. Downes, I. Batty and J. Bramham (UK) 253

Regular Papers

Effect of ATP on binding of Ca^{2+}/calmodulin-dependent protein kinase II with calmodulin
H. Sugiura and T. Yamauchi (Japan) 270

Characterization of interleukin-8 receptors in human neutrophil membranes: regulation by guanine nucleotides
M.L. Barnett, K.A. Lamb, K.M. Costello and M.C. Pike (USA) 275

Identification and target-size analysis of the leukotriene D_4 receptor in the human THP-1 cell line
C. Rochette, D.W. Nicholson and K.M. Metters (Canada) 283

Sulfhydryl reactive phenylarsine oxide inhibits signal transduction in NK and LAK cells: effect on zeta-chain phosphorylation and phosphatidylinositol level
A. Bajpai and Z. Brahmi (USA) 291

Activation of soluble guanylate cyclase through phosphorylation by protein kinase C in intact PC12 cells
J.-C. Louis, M.-O. Revel and J. Zwiller (France) 299

The competence progression model in CHO-K1 cells: the relationship between protein kinase C and immediate early gene expression in the insulin mitogenic signal
S. Ross and E. Englesberg (USA) 307

Rapid Report

Magnesium protects phosphatidylinositol-4,5-bisphosphate-mediated inactivation of casein kinase I in erythrocyte membrane
V.P.S. Chauhan, S.S. Singh, A. Chauhan and H. Brockerhoff (USA) 318
